

FDRG Seminar

Imaging detachment and transport of aerosols from surfaces, filters and liquid-air interfaces

presented by

Marion Arzt

Fluid Dynamics Research Group, Curtin University
Karlsruhe Institute of Technology, Germany

The detachment of aerosols from surfaces was of interest of many researchers. However much remains unknown, especially for non-aqueous liquids. This work presents examinations of bubbles in different liquids and on liquid-air interfaces using a high-speed camera. Furthermore drop generation by bursting bubbles on free surfaces and filters will be discussed.

Date: Friday 7th March
Time: 4pm – 5pm
Location: 215:300
Curtin University, Bentley Campus

No RSVP required. For queries please email:
