

## FDRG Seminar

Gas/liquid and gas/solid separation research applied to natural gas compression and long distance transport.

presented by

**Prof Zhongli Ji**

Department of Mechanical Engineering,  
China University of Petroleum,  
Beijing Key Laboratory of Process Fluid Filtration and Separation  
Beijing, China

The talk will be focused on the application of gas-liquid/solid filtration technology in long distance natural gas stations, including detection of the performance of filter and separator, the structural analysis of tubular filter elements and the optimum design of cyclonic separators for this application.

Date: Monday 29<sup>th</sup> August  
Time: 12pm – 1pm  
Location: 215:300  
Curtin University, Bentley Campus

No RSVP required. For queries please email:
